

One more step towards the Right Direction:

Our spotlight for the 2018/2019—year project was at the Government Science Secondary School Lugbe, Abuja, FCT, Nigeria (GSSS—Lugbe) which was founded on December 2002, gave scholarship to qualified students, and at the Festival Road Primary School, Garki, Abuja, FCT, Nigeria which is a government-owned primary/junior secondary school (K-12) educational institution established on April 13th, 1987. So far, the Ane Osiobe International Foundation has executed six back to school—outreach events in the city of Abuja since 2015 and other side projects to further the goals of this great foundation, which is to increase the public understanding of the benefit of supporting educational advancement.

On June 28th, 2019 the Ane Osiobe International Foundation visited the Government Science Secondary School Lugbe, Abuja, FCT, Nigeria (GSSS—Lugbe) for our yearly back to school events and on December the 5th, 2019 we visited the Festival Road Primary School, Garki, Abuja, FCT, Nigeria.

We believe that even as we help these children in developing the knowledge and skills needed to succeed in school, it is also essential to help them build self-confidence. We hope that the back to school materials would help the students look forward to attending the next school year.

This is one more step towards the right direction to achieving the mission and vision of our great foundation. There is still so much that needs to be done in improving the literacy rate of our nation Nigeria and content Africa. The foundation holds up so much hope and enthusiasm for the future. Our mission and vision are to fan the flames of our country's gifts, and it will be our pleasure to have you come aboard and lend a hand.

From Ane Osiobe International Foundation,
God Bless!!! 😊😊😊😊
